

## Semi-structured interview on emergence – healthy volunteers

### General questions

- (1) Tell me everything that was going on in your mind starting from anaesthesia induction to the awakening from anaesthesia
- (2) If you had some experiences related to the scanner or the experiment, describe them as precisely as possible

### Specific questions

- (3) If you had some moods or feelings, specify them
- (4) If you had visual experiences, list the figures, objects and characters you have seen
- (5) If you had some experiences of your own body or self, describe them
- (6) If some changes happened in your experiences, for example one object or feeling was replaced by another, describe them
- (7) Tell me if you remember something else that is not reported yet

### Additional questions

Free questions depending on the report.
